

S Adams St Sidewalk & Intersection Improvements

September 24, 2019

AMERICAN
STRUCTUREPOINT
INC.

Purpose & Need

- **Add sidewalk along east side of S Adams St**
 - **Between S Patterson St and Kirkwood Ave**
 - **Pedestrian demand existing shown by worn path**
 - **Bus stop on southeast quadrant of S Adams St and W Kirkwood Ave will remain**

S Adams St (Looking South)

Purpose & Need

- Improve traffic flow at S Adams St & W Kirkwood Ave
- Provide separation between motorists and cyclists

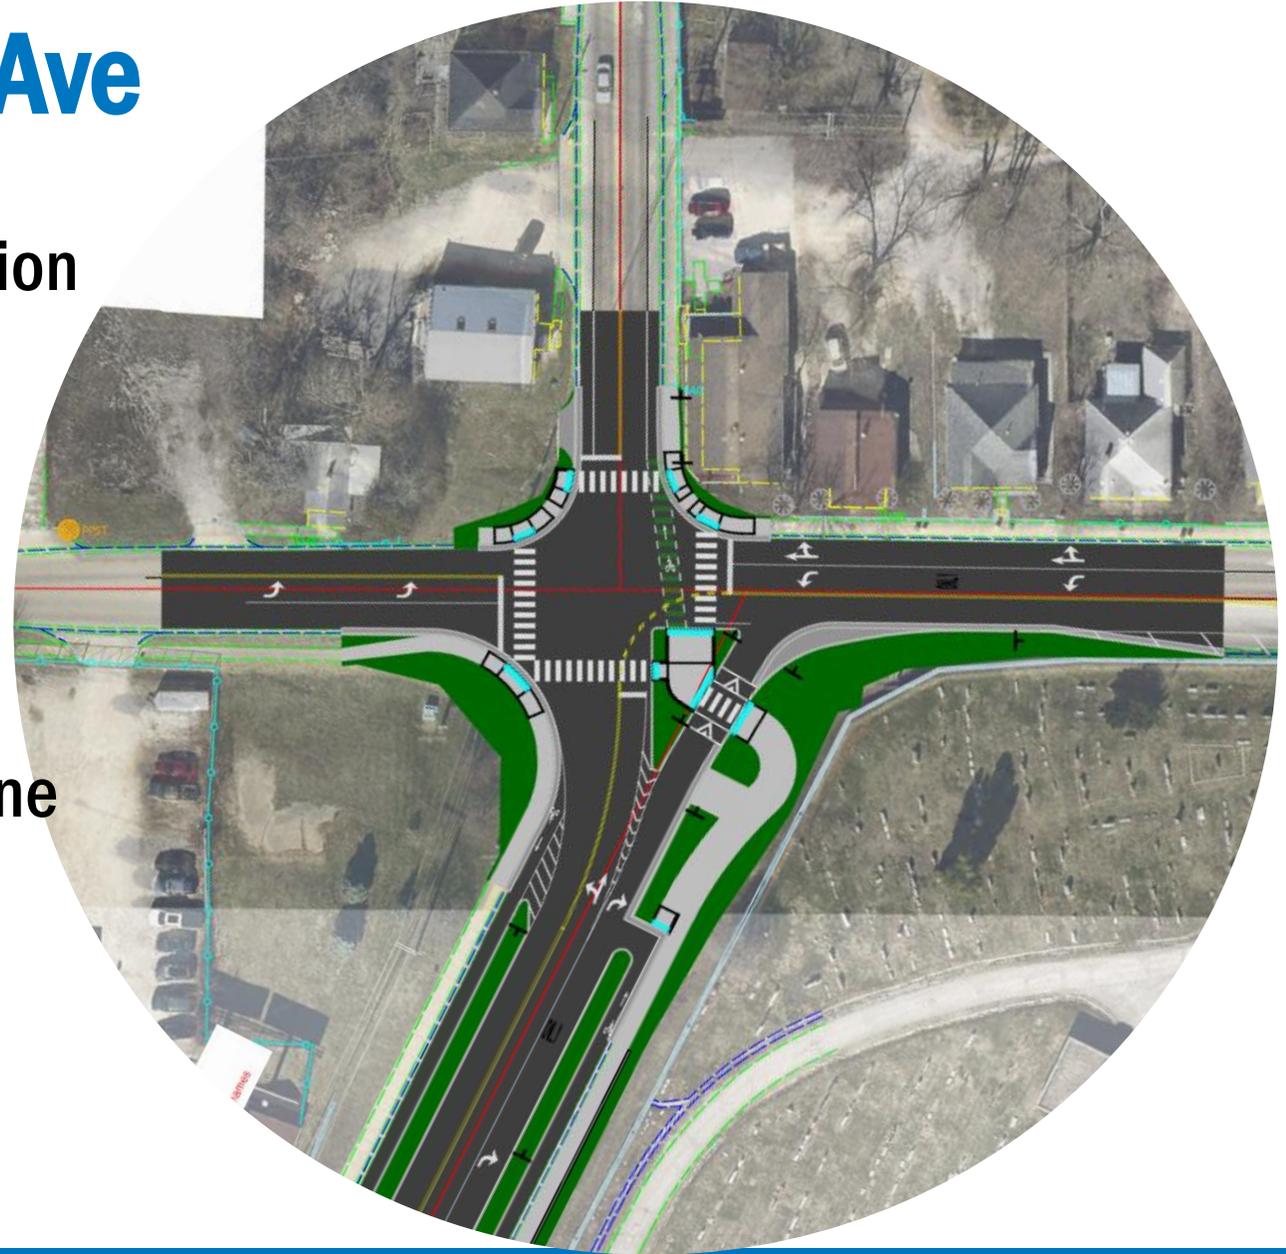

Traffic Study

- Existing intersection operates poorly due to split phasing (Eastbound & Westbound operate separately)
- Conditions will worsen over time as traffic grows
- Account for developments near 3rd St/ S Adams St & Patterson St
- Consider several alternatives
- Goal: Improve operations

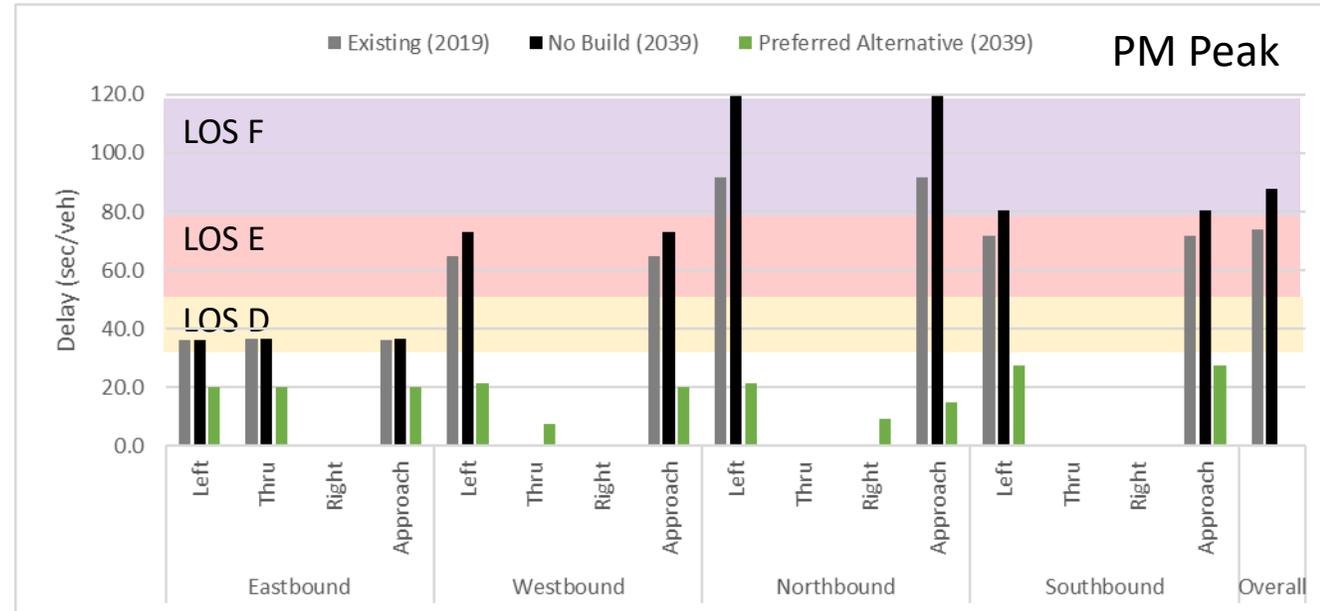

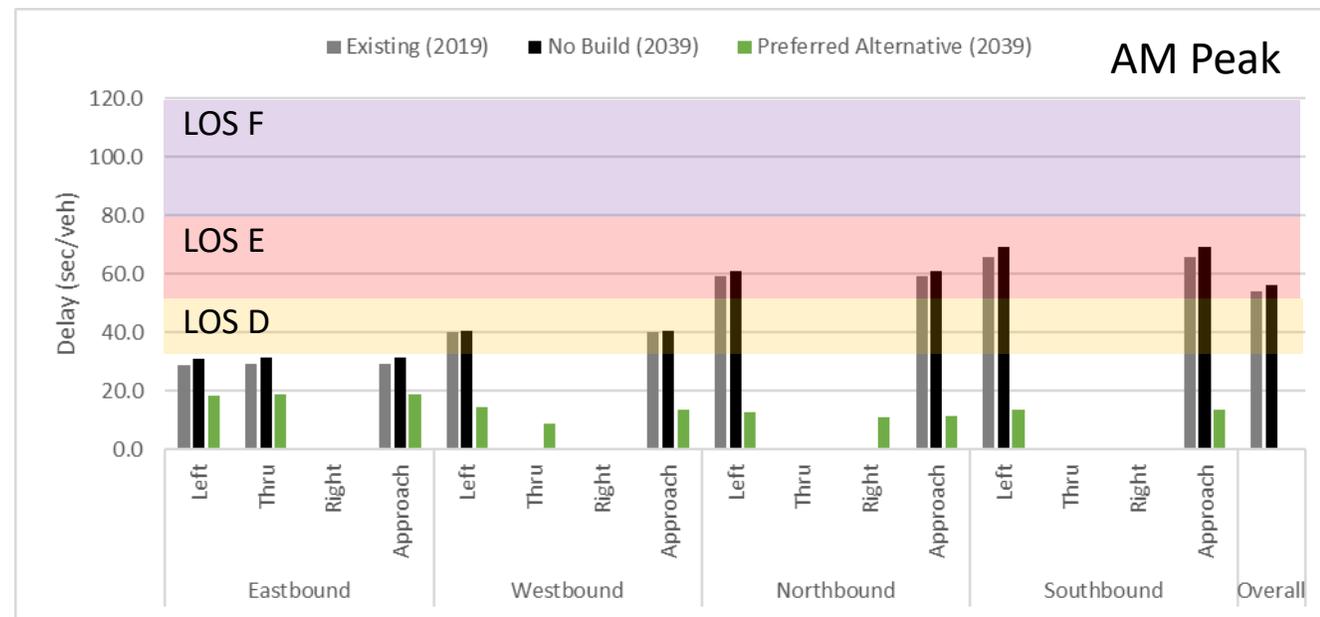

S Adams St & W Kirkwood Ave

- Northbound right turn now a yield condition
- Reconfigure westbound approach lanes
 - (1) left turn lane + (1) thru/right lane
- All new signal equipment
- All new curb ramps
- Raised crosswalk across NB right turn lane
- Bus stop remains in current location

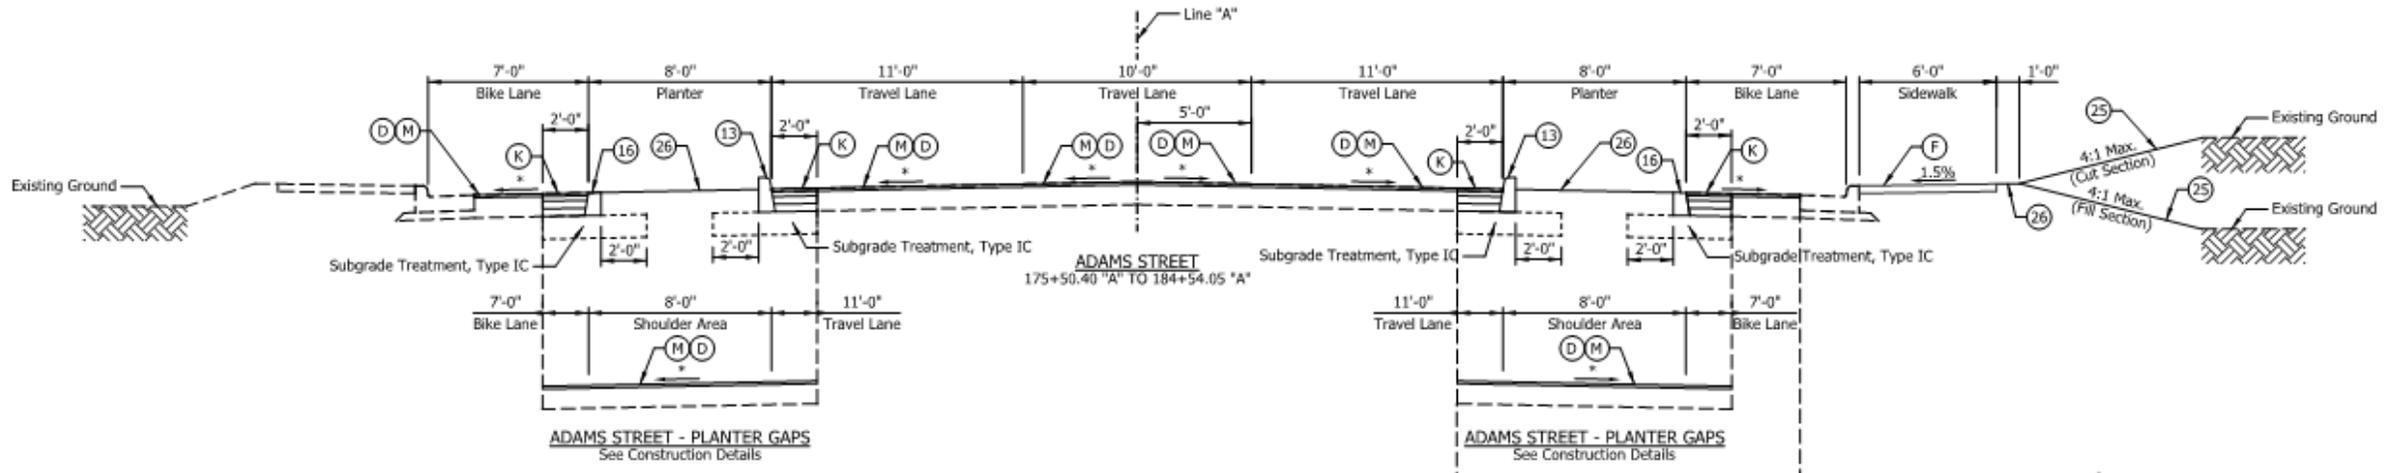

Traffic Study

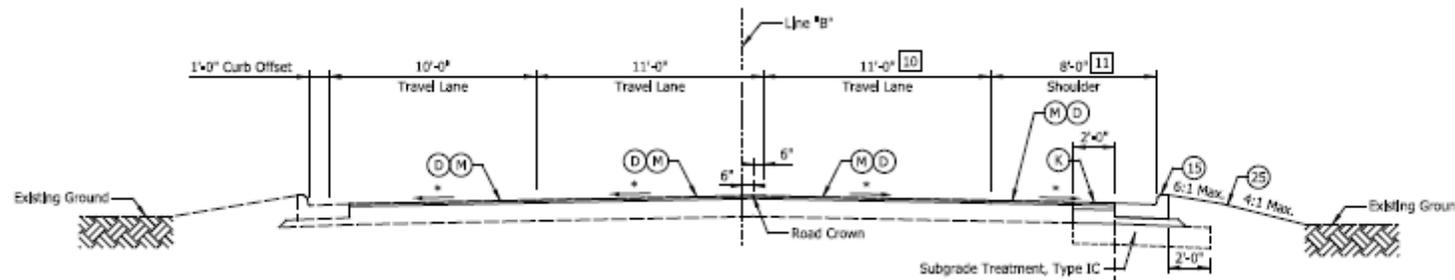

- **Benefits of Preferred Alternative**
 - Eastbound and Westbound Approaches operate concurrently, which creates more green time
 - Reduces delay
 - Provides for all pedestrian movements

Proposed Typical Sections

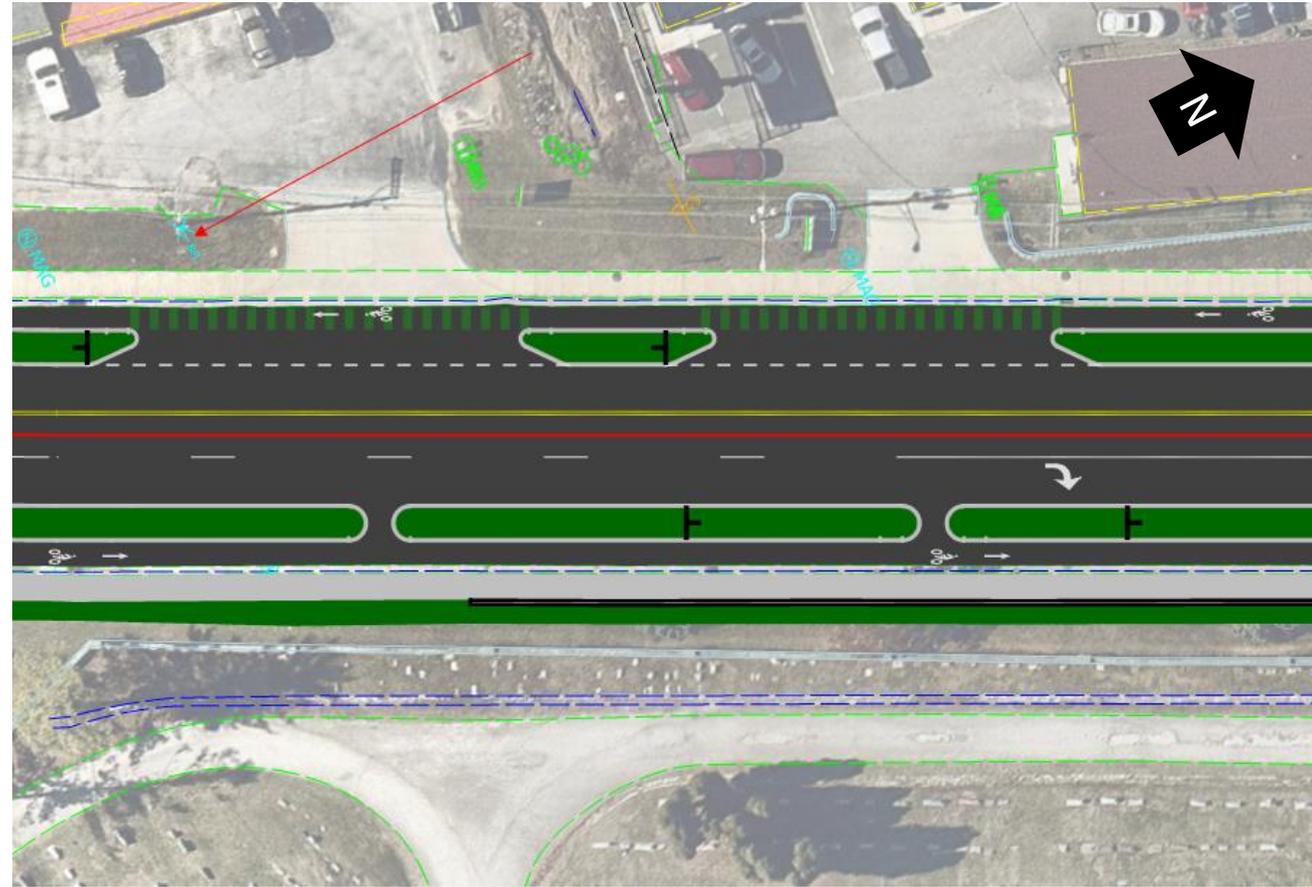

S Adams St – Facing North

W Kirkwood Ave – Facing East

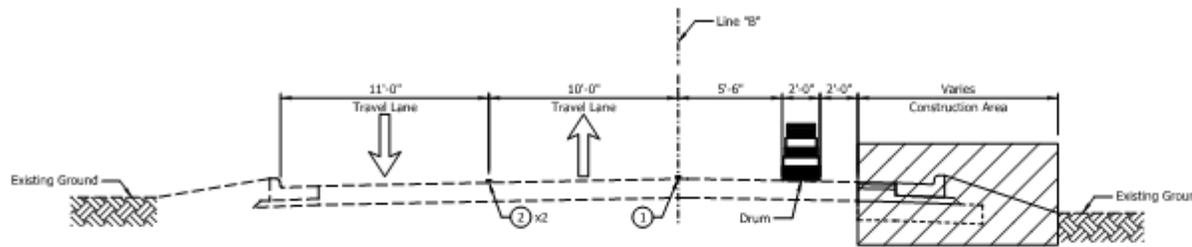

S Adams St

- Remove 1 southbound lane
- Provide separation between cars & bikes
- Provide new sidewalk along cemetery
- Maintain driveways

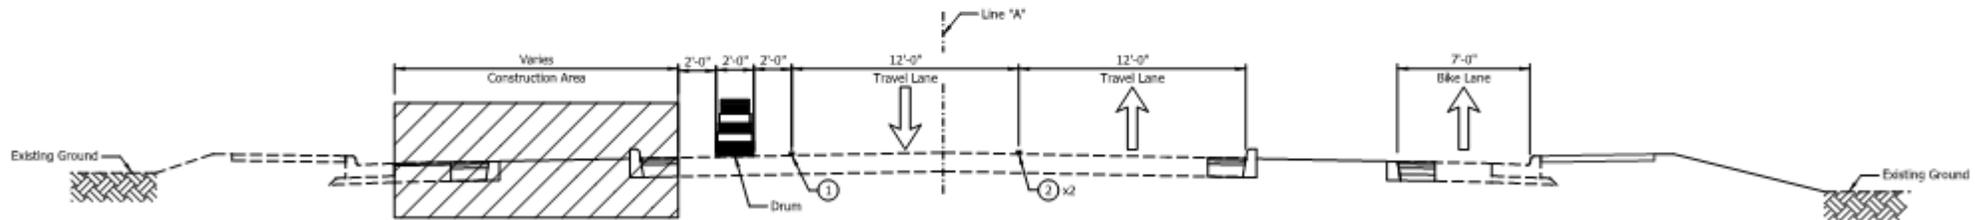

Maintenance of Traffic

- S Adams St will remain open (1 lane per direction)
- Multi-phased construction sequence

PHASE 1

PHASE 2

Maintenance of Traffic

- Expect delays at Adams St & Kirkwood Ave
- No access to/from N Adams St in Phase 2

Project Schedule (DRAFT)
